

Appln. No. 10/553,694
Response dated July 24, 2007
Reply to Office action of June 28, 2007

REMARKS

This communication has been carefully reviewed. The undersigned contacted the examiner and received clarification that the examiner was expecting the election of a single species of "chaperonin". Accordingly, applicants elect without traverse the single species of "GroEL" as a species of a chaperonin, which is a subgenus of a folding factor.

Favorable consideration and allowance are respectfully solicited.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.
Attorneys for Applicant(s)
